PROJECTS

SUCCESS GRAPHIFY Oct 2021-Jan 2022

Ready to use Flutter Application. Uses codeforces API. Useful for codeforces programmers.

This is my group project (group of 3). we basically make analysis easier for people who are highly active in codeforces contests. Basically for a competitive programmer.

450-DSA TRACK Jan 2021 - Feb 2021

450 DSA Cracker is a comprehensive list of 400 + topic wise questions to build your confidence in data structure and algorithms and prepare yourself for placements. Topic wise progress and Topic wise question search.

FOOD BLOG Oct 2020 - Nov 2020

Web App for foodies. People blog posts about the dish and restaurant on this web

Blog posts, Comments, Edit blog posts, comments, Search posts, are some features of this web app.

This is mern project.

TRELLO CLONE Aug 2020 - Sep 2020

A Trello clone built using the MERN stack. In this project I am going to replicate the Trello one using the same tecnologies as they do in the frontend (like React, and Redux for the front-end) and backend. Main npm pakage for drag and drop

React Trello

COST ANALYZER May 2020 - Jun 2020 **Features**

- it is a Full-Stack web app
- JWT-Authentication. user privilages. login sign up,forget Password ,logout all have seperate routes with the help of react router. user can add and remove their transactions. App tells you all your's income and expenses.
